Steering/Technical Subcommittee Meeting

Friday, January 23, 2009, 4:00 to 5:00 P.M.

*COMPASS, Conference Room
800 S. Industry Way, Suite 100
Meridian, Idaho*

Minutes

I. Discussion Items

a. Review Progress on Scope of Work Development Elements

Sally Goodell reviewed the integrated policy/implementation and technical frameworks matrix developed by herself, Patricia Nilsson and Meg Rush. Sally said the goal was to capture the policy discussion around the coordination at the comp plan stage, what happens in development review, and what policy issues need to be identified that are not currently being done. The matrix is broken down into the individual and combined elements of responsibility of the Cities, the County, COMPASS, and ACHD.

After review of the matrix, the Committee members suggested the following changes/additions:

- Under the box titled "Cities/County": Rename "horizon year" and "horizon year population" to "build out population" and "build out employment."
- Under the box titled "COMPASS/Cities/County: Add bullets - "Level of Service" and "Corridor Design."
- Under the box titled "COMPASS": Change the bullet to read: "Define transportation system to serve 20 year build out."
- Under the boxes title "ACHD" and "VRT" clarify that "transportation systems" means roads, transit, and alternative transportation.
- Rename "ACHD" box to "ACHD/ITD."

Deanna said to add a third box that includes the Land Use entities role in transportation, because they have a minor role: sidewalks, pathways, greenbelt, etc.

Sally noted a new proposed element in the process of having Valley Regional Transit define transit improvements to serve 20 years of trips.

Gary Allen asked to flag the issue of planned communities for future discussion.

After discussion of what information the comp plans have to have, Sally will add a bullet to the "Plan Must" list: "define the minimal elements the comp plan must support."

Sally asked if the Subcommittee was comfortable with taking the matrix forward to the BGG Consortium for review and showing how it differs from the Adequate Public Facilities Ordinance. Sally stated there needs to be some level of buy-in from the Consortium before staff begins the work of how to implement it.

b. Discuss Agenda Items for Next Steering/Technical Committee Meeting

Deanna will email the existing power point slide show presentation to the Steering Committee for comments and recommendations for updating.

The Agenda Items for the February 5, 2009, Steering/Technical Committee and February 12, 2009, BGG Consortium will be:

1. Review Communication/Outreach Framework
2. Review Integrated Policy/Technical Framework
3. Update of the Level of Service Analysis
4. Update of the Area of Impact Process and Next Steps
